

ALAMAHUL BAYAN

BACKEND / WEB DEVELOPER

Garut, Jawa Barat 44185, Indonesia | bayanalamahul3@gmail.com | +6281284183061 | [LinkedIn](#)

PROFILE

Backend/Web Developer and **Informatics Engineering** student with experience building **full-stack web applications, backend systems, and AI-integrated solutions**. Skilled in **PHP/Laravel, JavaScript, Node.js, Express.js, SQL, and PostgreSQL**, with experience **integrating APIs and databases**. Experienced in **AI integration** using **Gemini API** for **conversational chatbot** and **voice-enabled applications**. Familiar with **Docker, GitHub Actions, CI/CD**, and **basic Kubernetes deployment** through **Rancher**.

WORK EXPERIENCE

Independent Developer Oct 2022 – Present

- Developed full-stack web applications and AI-integrated solutions using modern web and backend technologies.
- Built applications integrating frontend interfaces, backend services, databases, and external APIs.
- Applied Docker, GitHub Actions, and CI/CD workflows in collaborative software development projects.

Internship — PT KAI Aug 2022 to Oct 2022 Bandung

- Supported operational administration, data validation, reporting, and passenger data management.
- Maintained accurate schedule, ticketing, route, and seat inventory data.
- Collaborated with the operations team to support efficient daily workflows.

TECHNICAL PROFICIENCIES

- Backend:** PHP, Laravel, Node.js, Express.js, REST API
- Frontend:** HTML, CSS, JavaScript, React.js, TypeScript, Next.js, jQuery, Tailwind CSS
- Database:** SQL, MySQL, PostgreSQL, MongoDB, Prisma
- AI/ML:** Python, Scikit-learn, Gemini API, Conversational AI, Chatbot, Voice-enabled AI, NLP.
- DevOps:** Git, GitHub, Docker, Docker Compose, GitHub Actions, CI/CD, Kubernetes (Basic), Rancher
- Tools:** Linux, AWS, Trello, Google Cloud, Vite, Webpack, VS Code, Laragon
- Security:** Basic Knowledge of JAST & DAST

FORMAL EDUCATION

Institut Teknologi Garut Sept 2023 to Present

Bachelor of Informatics Engineering (S1)

GPA : 3.74

SMK Santana 2 Garut Jun 2020 to Apr 2023

Software Engineering (Rekayasa Perangkat Lunak)

RECENT ACTIVITY

Dicoding Community ITG Dec 2025 to Present

- Technology community activities, collaborative projects, and professional skill development.

Software Development Learning Aug 2025 to Present

- Continuously developing software engineering skills through online learning platforms and technical courses.
- Studying web development, backend development, cloud computing, AI, and software development practices.

SELECTED CERTIFICATIONS

- ASAH 2025 — Dicoding
- Intermediate Web Development — Dicoding
- Fundamental Backend with JavaScript
- Fundamentals of AI & Data Science — Dicoding

PORTFOLIO

E-Wallet Sentiment Monitoring

Oct 2025 to Present

Full-stack AI & Data Analytics Platform (In Development)

React, Express.js, Python, Scikit-learn, PostgreSQL, Prisma, Docker, GitHub Actions, CI/CD

- Developed a sentiment monitoring platform for analyzing e-wallet user reviews.
- Integrated React, Express.js, Python-based AI/ML processing, and PostgreSQL using Prisma ORM.
- Implemented Docker-based development and GitHub Actions CI/CD workflows for collaborative software delivery.

Repo: <https://github.com/alamahul/e-wallet-sentiment>

SOTOYS GRT

Sept 2025 to Present

E-Commerce Platform (In Development)

React 19, TypeScript, Vite, Tailwind CSS, Express.js, PostgreSQL, Supabase, Midtrans

- Led a 3-person team to develop a multi-role e-commerce platform connecting local farmers with customers.
- Integrated AgriBot, a Gemini API-powered conversational AI chatbot for natural-language interaction, product information, logistics, and dashboard insights.
- Designed voice-enabled interaction to improve accessibility for farmers with limited digital literacy.

Demo (development): <https://sotoys-grt-frontend.vercel.app/>

AgriConnect

Digital Agribusiness E-Commerce Platform (Prototype — TECHSOFT 2026)

Team Lead | React.js, Vite, Tailwind CSS, Gemini API, React Leaflet, Recharts

- Led a 3-person team to develop a multi-role e-commerce platform connecting local farmers with customers.
- Integrated AgriBot, a Gemini API-powered conversational AI chatbot for natural-language interaction, product information, logistics, and dashboard insights.
- Designed voice-enabled interaction to improve accessibility for farmers with limited digital literacy.

Prototype: <https://agri-connect-123.vercel.app>

Clinician Vitality AI

AI-Driven Burnout Prediction & Workforce Planning (Prototype)

React, Conversational AI, Machine Learning System Design

- Designed an AI-driven system for predicting clinician burnout risk using non-sensitive workload and workforce metadata.
- Designed a Machine Learning architecture for risk scoring and AI-assisted workforce planning.
- Developed a chatbot-based prototype to provide conversational access to system insights.
